Last Update: 06/05/2022

Corsa	
Switch Type: Tactile	Tecsee
Total Stem Travel	3.555 mm
Peak Force	55.4 gf
Bottom Out Force	64.1 gf
# of Upstroke Points	926
# of Downstroke Points	1001

### Testing Notes

- Data points 1755-1774 were removed from the upstroke force curve due to clear data artifact that was not actually present in the switch's feeling.
- A fairly normal looking medium to lightly tactile force curve. The only thing potentially worth pointing out is simply how long the tactile bump is for how light the actual peak force is. Typically, longer tactile bumps tend to have a higher peak force in my experience.
