

MODE Tomorrow Yellow Prototype

Last Update: 12/14/2022

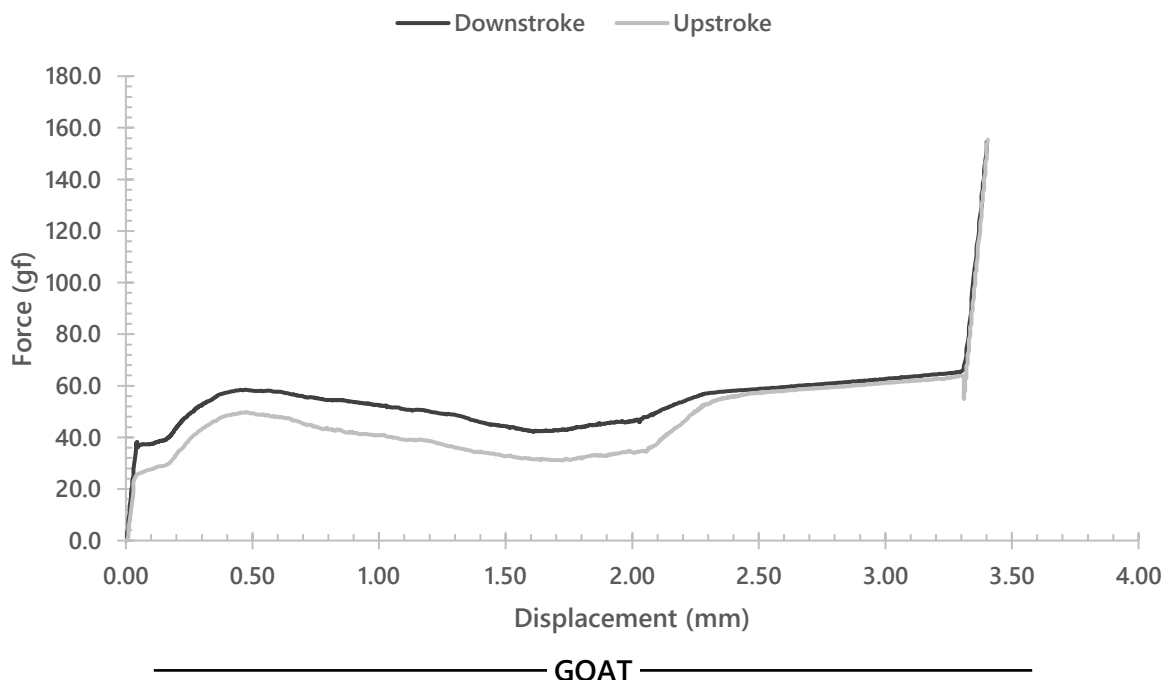

MODE Tomorrow Yellow Proto	
Switch Type: Tactile	Outemu
Total Stem Travel	3.300 mm
Peak Force	58.5 gf
Bottom Out Force	65.6 gf
# of Upstroke Points	1107
# of Downstroke Points	1093

Testing Notes

- Notice that the same strange downward spike in force at the start of the upstroke curve is present in both the initial Tomorrow Blue Prototype and Purple Prototype force curves, leading me to believe this is a function of the switch mechanism and not a data error.
- *NOTE:* This switch had lubrication that was modified during the prototyping phase of the design and thus this force curve may look different than the final, released product.
