

## Kelowna 3 Stage 55g Spring - Linear

Last Update: 06/25/2023

Kelowna 3 Stage 55g	
Switch Type: Linear	SPRING
Total Stem Travel	3.355 mm
Peak Force	44.3 gf
Bottom Out Force	44.3 gf
# of Upstroke Points	874
# of Downstroke Points	1202

### Testing Notes

-NOTE: This testing was done to compare a range of springs in a fixed switch design. The spring used in this testing was held in an otherwise stock KTT Custard switch.

- While this is a fairly normal looking linear force curve for most of it, the extra 'bump' noted at the bottoming out of the downstroke is both strange and due to an unknown cause.
