Testing Notes

- Data points 1952-1957 and 2166-2173 were removed from the upstroke force curve due to clear data artifact that was not actually present in the switch's feeling.
- By all considerations and appearances, a fairly normal linear force curve with the exception of the sharp dip in the bottom-out region of the downstroke. I've got no explanation at the moment for what the cause of this is.
