

MODE Tomorrow Blue Prototype

Last Update: 12/14/2022

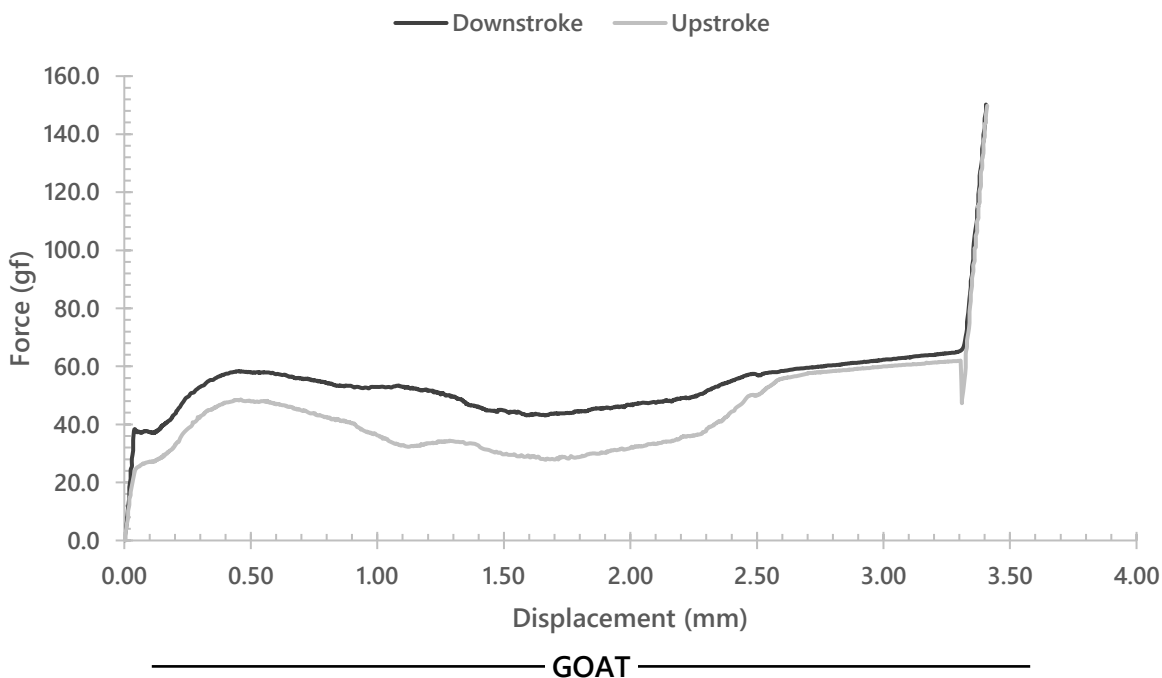

MODE Tomorrow Blue Proto	
Switch Type: Tactile	Outemu
Total Stem Travel	3.300 mm
Peak Force	58.3 gf
Bottom Out Force	65.2 gf
# of Upstroke Points	1160
# of Downstroke Points	1188

Testing Notes

- By all considerations and appearances, a fairly normal tactile force curve with the exception of the sharp dip in force at the start of the upstroke curve. While I would be inclined to initially chalk this up to a collection error, the fact that this is a prototype with altered lubrication leads me to point to that as the root cause.

- *NOTE:* This switch had lubrication that was modified during the prototyping phase of the design and thus this force curve may look different than the final, release product.
